

VSP 2.0

Field Guide

Background:

On June 4, 2008, Act 271, R321, H4601 was signed to create the Office of Victim Services Education and Certification (OVSEC) within the Crime Victim Ombudsman's office to establish certification and continuing education requirements for victim services providers and authorize and promulgate necessary regulations. The basic core VSP training requirements were set at this time. *Became effective January 1, 2009*

On June 10, 2017, Act 96, R126, S289 was signed to create the South Carolina Crime Victim Services Division which included consolidation of several state government victim services programs under the Office of the Attorney General. OVSEC was renamed and moved from under the Crime Victim Ombudsman and into a separate department within the Crime Victim Services Division, the Department of Crime Victim Services Training, Provider Certification, and Statistical Analysis (CVST). *Became effective July 1, 2017*

November 2017- Kim Hamm was hired to lead the new department and with the assistance of a multidisciplinary committee, recommendations were made to the Victim Services Coordinating Council to update the Victim Service Provider (VSP) basic core (15-hour) training for new VSPs for the first time since its inception.

July 12, 2018- The Victim Services Coordinating Council (VSCC) unanimously approved the proposed VSP updates, dubbed VSP 2.0.

January 1, 2019- VSP 2.0 updates became effective.

Implications:

Any agency that currently provides the VSP basic core (15-hour) training course must make necessary changes to reflect the updates to the essential mandatory criteria for each of the training requirements by January 1, 2019 and have changes approved by the Department of Crime Victim Services Training, Provider Certification, and Statistical Analysis (CVST). The Department of Crime Victim Services Training, Provider Certification, and Statistical Analysis (CVST) will be available to assist organizations as they make necessary revisions to their curricula to meet the January 2019 deadline. Organizations will need to provide documentation to CVST proving necessary changes have been made before any basic core trainings can be accredited for VSP hours. Documentation should include: Detailed agenda, course descriptions, and any other documentation to show necessary updates (PowerPoint presentations, manuals, curricula, etc.)

Any agencies that do not currently provide VSP basic core training, but wish to, must provide CVST a comprehensive curriculum, detailed course descriptions, detailed agendas to display that all requirements will be included before being approved to provide the basic core training for VSP credit hours.

A detailed breakdown of the updates and requirements are included in the subsequent sections of this document.

VSP 2.0

Overview of updates

Updates to Basic Core VSP training topics:

- *Training requirements and hourly breakdowns have been amended and revised.*

Essential/Mandatory Criteria set for Basic Core VSP Training:

- Each topic will have core criteria that must be included in the Basic VSP training, regardless of which agency is providing the training.
- These criteria are the minimum standards that ALL victim service providers should know upon completion of Basic VSP training.

Statement of training standards:

- All VSPs must obtain a minimum of 15 hours in approved Basic Core for VSPs in year 1 of employment and a minimum of 12 hours of approved VSP continuing education each subsequent calendar year for VSPs.
- All Notifiers/support staff must obtain 2 hours of specialized training for Notifiers every other year.
